PROFILE

Frontend & Mobile Engineer | Team Leader
Experienced in React and React Native, I led the migration of Belo's crypto wallet app (1.5M+ users) and mentored a team of developers. Skilled in creating scalable, high-performance applications with a passion for solving complex challenges.

EMPLOYMENT HISTORY

Feb 2022 — Present

Frontend and Mobile Lead, belo
Buenos Aires - Remote

Led the migration of Belo's crypto wallet app (1.5M+ users) from Flutter to React Native, completing the project in 5 months. Managed frontend and mobile development, mentored a team, and contributed to various web projects, including the landing page and internal dashboards. Focused on delivering high-quality, scalable solutions and optimizing app performance across platforms.

May 2021 — Jan 2022

Frontend Developer, Navent
Buenos Aires - Hybrid

Contributed to the development and maintenance of major real estate platforms (e.g., Zonaprop, Imovelweb) using React. Collaborated with a team of five developers, improving user experience and optimizing performance. Gained hands-on experience in managing large codebases, handling high traffic, and working with agile methodologies.

Feb 2021 — May 2021

Frontend Developer, Aconpy
Buenos Aires - Hybrid

Led the development of a virtual wallet project, "Paiddly," using React. Took full ownership of the project, from coding to design decisions, as the sole frontend developer. This experience enhanced my independent problem-solving, decision-making skills, and ability to meet tight deadlines.

EDUCATION

Oct 2020 — Jan 2021

Bootcamp, Henry
Buenos Aires - Remote

Completed an intensive 800+ hour bootcamp, gaining expertise in both frontend and backend development. Mastered technologies including JavaScript, React, Node.js, Express, PostgreSQL, and MongoDB. Developed practical skills in Agile methodologies, Git, and cloud tools, with a focus on building scalable, full-stack applications.

Mar 2019 — Dec 2020

Motorcycle Technician, Universidad Tecnológica Nacional (UTN)
Buenos Aires

Completed a technical degree in Motorcycle Technology, focusing on the maintenance, repair, and optimization of motorcycle systems. Gained hands-on experience in engine diagnostics, electrical systems, and mechanical repairs. Developed a solid foundation in technical problem-solving and practical skills in the automotive field.

SKILLS

Frontend Development | React

Mobile Development | React Native

State Management | MobX, Redux

Testing | Jest, React Testing Library

Agile Methodologies | SCRUM, Kanban

Team Leadership | Mentorship, Hiring

Mobile Optimization | Performance Tuning, Device Resource Management
